

The Green Dragon

Doral Academy Elementary's vision of a reading garden is now a reality. Thanks to the generosity of The Home Depot our school has its very own reading garden. The Home Depot sponsored the garden in its entirety. The garden features native plants, a butterfly garden and benches for the students to sit down and read while enjoying the outdoors. The school's gardening club participated in the creation of the garden, which they have named "The Green Dragon". This experience has provided Doral Academy students an opportunity to explore the natural environment, appreciate the beauty and value of nature, and work together to beautify the school.
